

Class 2

Activity 1: Code

What section of the code addresses these concerns?

- Location of Graywater Systems (Setbacks)
- Estimating Graywater Discharge
- Potential contact with pathogens

Activity 2: Partner Activity 16012.1(C); Graywater Systems - General

Graywater shall not be used in spray irrigation, allowed to pond or runoff and shall not be discharged directly into or reach any storm sewer system or any surface body of water.

Partner 1: Explain these concepts in plain English

Partner 2: Explain why this is important

Activity 3: Clothes Washer System Requirements

Read scenarios, determine if scenario is allowed, and cite applicable section of code.

System 1:

Carla's washing machine hose is attached to a labeled 3-way valve. The graywater is distributed through a 1" tube, every 4 feet there is a tee placed in the line and graywater is discharged into a mulch basin.

System 2:

The washing machine hose is attached to a 1" pipe that runs outside. The pipe discharges the graywater into a pit of mulch 1ft from the property line.

System 3:

A co-housing community installed a washing machine in their common laundry room uses over 300 gpd.
