California Climate Investments Overview
California Climate Investments: Statutory Requirements

1. Reduce GHG emissions

2. Direct investment toward the most disadvantaged communities in the State

3. Maximize economic, environmental, and public health benefits to the State
California Climate Investments: Program Areas

- Transportation & Sustainable Communities
- Clean Energy & Energy Efficiency
- Natural Resources & Waste Diversion

Disadvantaged Communities: CalEnviroScreen

Pollution Burden
- Exposures:
  - Ozone Concentrations
  - PM2.5 Concentrations
  - Diesel PM Emissions
  - Drinking Water Contaminants
  - Pesticide Use
  - Toxic Releases from Facilities
  - Traffic Density

Population Characteristics
- Sensitive Populations:
  - Asthma Emergency Department Visits
  - Cardiovascular Disease (Emergency Department visits for Heart Attacks)
  - Low Birth-Weight Infants

Environmental Effects
- Cleanup Sites
- Groundwater Threats
- Hazardous Waste
- Impaired Water Bodies
- Solid Waste Sites and Facilities

Socioeconomic Factors
- Educational Attainment
- Housing Burdened Low Income Households
- Linguistic Isolation
- Poverty
- Unemployment
Disadvantaged Communities: AB 1550

Assembly Bill (AB) 1550 (Gomez, Statutes of 2016) modified the investment minimums to disadvantaged communities. AB 1550 requires at least 25 percent of funds go to projects within and benefitting disadvantaged communities and at least an additional 10 percent is for low-income households or communities.
AHSC Overview
AHSC Program Goal

To fund projects that result in:

• the reduction of greenhouse gas (GHG) emissions and vehicle miles traveled (VMT) and

• increased accessibility of housing, employment centers and key destinations through low-carbon transportation options such as walking, biking and transit.
## What does it fund?

Kings Canyon Connectivity Project
ICP Project – City of Fresno

Project Details

- 96-100% DAC
- 135 affordable housing units for 30-60% AMI
  - 89 family units
  - 46 senior units
- 100% Affordable
- Workforce training program and construction apprenticeships

- Transportation Service: Bus
- Building important bike and pedestrian infrastructure along several blocks to 2 new BRT stops (July 2017)

AHD: $14,863,754
HRI: $47,200
STI: $513,222
TRA: $155,250
Total Award amount: $15,579,426
## Project Details

- **Not in a DAC**
- **56 affordable housing units for 30-60% AMI**
  - 15 one-bedroom
  - 47 two-bedroom
  - 17 three-bedroom
- **70% Affordable**
- **2,700 sq. ft. Commercial**

- **Transportation Service: Bus**
- **Adding Class IV cycle track and bike lanes, curb extensions, sidewalk construction, bus vouchers**

### Funding Breakdown

- **AHD:** $5,873,372
- **HRI:** $3,570,000
- **STI:** $8,973,958
- **TRA:** $1,582,670
- **Total Award amount:** $20,000,000
Lindsay Village
RIPA Project – City of Lindsay

Project Details

- 86-90% DAC
- 49 affordable housing units for 30-60% AMI
  - 14 one-bedroom
  - 18 two-bedroom
  - 18 three-bedroom
- 100% Affordable
- Density: 20 units/acre
- 100% Solar PV and grey water recycling
- Transportation Service: Bus
- Vanpool and Public Transit ridership program with sidewalks, bike lanes, traffic calming

- AHD: $4,043,694
- HRI: $405,000
- STI: $1,069,659
- Total Award amount: $5,518,353

AHSC Best Practices

• Leadership Support and Dedication of Time
  • Prioritization from local leadership and management
  • Mobilizing necessary departments
  • Time dedicated to coordination, project management, and application development

• Organizing Around Corridor and/or Transit Line
  • East Bay Corridors (MTC) or Blackstone Corridor (City of Fresno)
AHSC Best Practices

• Project Management
  • Need a strong project manager, whether that is for the project or the jurisdiction-level coordination
  • Technical Assistance

• Project Components & Trends
  • Housing + Transportation, especially augmenting transit service
  • Greenhouse Gas Quantification Methodology – get familiar 😊
  • Well leveraged projects
AHSC Application Process

• Final Draft Guidelines are posted on SGC website
• AHSC 2016-2017 Final Draft Guidelines to be considered for adoption by SGC at July 17th Council Meeting
• 2017 NOFA and Application Release Date October 2nd 2017
• Pre-Application Consultations and Checklist offered in October
• Application Due Date in early January 2018
California Climate Investments
Affordable Housing & Sustainable Communities Program

Overview & Latest Updates

SEEC Conference
June 14, 2017 | Fresno, CA
Department of Community Services and Development (CSD)
Low-Income Weatherization Program (LIWP)

Funded from the State of California’s Greenhouse Gas Reduction Fund
California Climate Investments
Cap-and-Trade Dollars At Work

Implementation of LIWP

CSD partners with a network of private, non-profit and public community-based organizations dedicated to helping low-income families and individuals achieve and maintain self-sufficiency and manage their home energy needs. LIWP Appropriations:

- Fiscal Year (FY) 14-15 Budget through FY 16-17 Budget: $174 M

Initially used to expand CSD’s existing weatherization programs and establish two new programs:

- Single Family Solar Photovoltaics (PV) Program (Statewide and Fresno EOC pilot)
- Multi-Family Energy Efficiency and Renewables Program (Statewide administrator), with TA and incentives to property owners (affordable housing) – fully subscribed

Opportunities with new Regional Administrators and Community Solar
Cap-and-Trade Dollars At Work
Implementation of LIWP

Goals:
- To date, 100% of households/buildings served are located in Disadvantaged Communities (DACs) as defined by the California Environmental Protection Agency
- Reduce greenhouse gas (GHG) emissions
- Improve the energy efficiency of low-income housing at no cost to eligible homeowners or renters
- Lower utility costs for low-income families
- Achieve other co-benefits, including workforce development
LIWP Opportunities in Local Communities

New Single Family Energy Efficiency and Solar PV Program Model:

- RFP for Regional Administrators (non-profits or government agencies) for service delivery of Energy Efficiency upgrades and renewables in an integrated approach
- Create a program model that has a better economy of scale and is more adaptable and responsive to Investment Plans/funding

Opportunities for synergies with local efforts

- Workforce Development and Job Creation
- Sustainability/Community Revitalization
- Health and Human Services
- Other Ideas?
Sustainability/Community Revitalization

CHERP (Community Home Energy Retrofit Project)

- A partnership with the City of Claremont, local energy efficiency experts and volunteers.

- 50+ homes for no-cost deep energy and home health retrofits though LIWP Region 4 Administrator (Build It Green)/CHERP remediation

Orange County: Cities of Buena Park and Garden Grove Economic Development Departments
Health and Human Services Opportunities

- CSD discussions with CDPH Climate Change and Health Equity Program
- Pilot project to involve county health department nurse home visitors to refer families with health conditions that can be worsened by climate change impacts (such as asthma, COPD and cardiovascular disease) to receive home weatherization services to improve their living conditions and health status.
- Involve CDPH Indoor Air Quality Program to possibly conduct some research to validate the benefits, such as monitoring indoor air quality
Future Initiative: Community Solar Pilot

Why Community Solar?
Cost Effectiveness & Equity:

- A single rooftop PV system can cost up to $25,000 and reduce one household’s electricity bill by up to 90%
- A Community Solar array can be used to reduce the electricity bills of multiple low-income homes by a lower—but still beneficial—percent
Future Initiative: Community Solar Pilot

CSD Vision for Community Solar:

- A project that is truly part of the “community”
- Reduces customer electricity costs
- Helps the customers who need it the most
- Requires no additional customer costs or financial barriers (credit scores, credit checks, etc)
- Billing that is easy to understand
- Serves customers who are not qualified for rooftop PV (renters, poor roof quality, etc)
- Provides energy efficiency and energy education
Future Initiative: Community Solar Pilot

CSD Vision for Community Solar Pilot Design:

- A model(s) that can be replicated if future funding becomes available
- Quantifiable GHG reduction
- Able to provide electricity at a lower cost per watt than rooftop PV
- Project completion by June 2020
- Bring leveraged dollars to the project
- Ability to target qualified customers with the greatest need (highest electric bills)
- A plan for finding and enrolling qualified customers
- Incorporate workforce development for DAC residents
- Partnerships: Non-profit or local government entity/utility company/developers/financial institutions

LOW CARBON TRANSPORTATION INVESTMENTS

• Funding provided by California Climate Investments
• ARB funding to support advanced technology clean transportation
• $325 million invested to date
• Projects cover nearly all means of transportation
FY 2016-17 Funding Allocations ($363 million)

• $363 Million appropriated and in a process of being awarded

• To accelerate transition to low carbon freight and passenger transportation
  – ~59% ($213 million) to light duty vehicle investments (CVRP, Equity Projects)
  – ~41% ($150 million) Heavy-duty vehicles and off-road equipment

• Special considerations for Disadvantaged and Lower-Income Consumers
### FY 2016-17 Funding Allocations ($363 million)

Programs for Individuals and Families (Light-duty Investments)

- Clean Car Rebates (CVRP) $133 million
- Car Scrap and Replace (EFMP and Plus-Up) $60 million
- Car Sharing and Mobility Options $8 million
- Financing Assistance $6 million
- Agricultural Worker Vanpools $3 million
Car Sharing and Mobility Options ($8M)

• Sacramento Metropolitan Air Quality Management District ($1.4 million)
  – Our Community Car Share
  – 8 Electric cars and charging stations
  – Serves 2,000 residents

• City of Los Angeles “Los Angeles Leading By Design” (1.7 million)
  – BlueLA Electric Car Sharing Program
  – Nation’s largest electric car sharing program in disadvantaged communities
  – 100 electric cars, 200 EV charging stations
  – Westlake, Pico Union, Echo park, Downtown
Heavy-Duty and Off-Road Investments

• Transformation of the on-road and off-road fleet to clean technologies
• Demonstration of new technologies & advancing commercial viability through pilots
• All demonstration projects will either be located in or will benefit disadvantaged communities.
Heavy-Duty and Off-Road Investments

- Clean Urban Transit Buses
- Clean School Buses
- Clean Delivery Trucks
- Clean Drayage Trucks
- Clean Trucks at Railyards and Freight Distribution Centers
- Multiple Clean Technologies used in Goods Movement
Heavy-Duty and Off-Road Investments

Hybrid and Zero Emission Truck and Bus and Bus Voucher Incentive Program (HVIP)

– Statewide program provides vouchers to help offset the higher costs of clean vehicles
– zero-emission trucks and buses
  • up to $95,000
– hybrid trucks and buses
  • up to $30,000.
Heavy-Duty and Off-Road Investments

- Zero-Emission Pilot Projects
  - Freight Equipment
  - Trucks and Buses

- Advanced Technology Freight Demonstration Projects
  - On-Road Trucks
  - Off-Road Equipment
Heavy-Duty and Off-Road Investments

San Joaquin Valley Transit Electrification Project - $13.4 million

- 15 Proterra battery electric buses
- 11 depot charging stations including 4 fast chargers
- Fresno, Stockton, Modesto, and Visalia
Heavy-Duty and Off-Road Investments

City of Porterville Transit Electrification Project - $9.5 million

— 10 GreenPower, 40-foot zero-emission all electric transit buses with depot charging
— Serve nine of the Porterville routes in DACs
— East Porterville, Strathmore & Tule River Indian Reservations
— Early 2018
Heavy-Duty and Off-Road Investments

SunLine Transit Agency Fuel Cell Bus Deployment - $12.6 million

- 5 New Flyer fuel cell buses
- Upgrades to existing hydrogen fueling
- Onsite renewable generation
- Operated on two routes daily from Indio to Mecca/Oasis
- The first bus is expected in early 2018.
Heavy-Duty and Off-Road Investments

Center for Transportation and the Environment

Fuel Cell Bus Project - $22.3 million

— 20 fuel cell electric buses
— Alameda-Contra Costa Transit District (25 routes) in the Bay Area
— Orange County Transportation Authority (5 routes) in Southern California
— Spring 2018
