San Francisco Region

Check out the San Francisco region's water and land use Story Map! SF is home to 4.66 million people - and this number is expected to grow. Visit the link to see an overview of the region, how land-use planning and water resources are managed, and how we can better integrate these two sectors!

If we truly want to tackle climate change, we must pursue collaborative solutions with co-benefits. Land use and water policy are extremely interconnected, so let's work together to create a resilient region!
