Virtual Policy Briefing

Ensuring Equitable Public Engagement
Through Coordinated Planning

JULY 9, 2020
9:00 AM - 12:00 PM

Five Nonprofits have been working together with the Local Government Commission as part of the Community Foundation Water Initiative to equitably integrate water management and land use decision making through their organizations. Leveraging what has been learned through COVID-19 response, the briefing will cover the role that coordinated planning plays in public engagement efforts.

The need for coordination of meaningful public engagement is more important than ever. This is especially true where water and land use decisions are concerned amidst racial injustice and concerns over public health, access to natural resources, economic resilience, and much more.
